Ideas to Try				
	Albert Einstein Greeting: Post a list of quotes with a number for each quote. Assign each student a number. Ask them to say good morning to the group, then write their quote and what it means. Then ask them to greet two other students and read their quote and response.	Each person shares: Ask each person to share a picture and why they chose that picture.	Alphabet Story: The first person who posts will start a sentence with the letter A. The next person to log on will need to read the first sentence and then build on the story with a new sentence starting with the letter B. This continues until a story has been built and everyone has a turn.	Write the message and create a challenge of the day
