

SQL commands

```
292 # https://en.wikipedia.org/wiki/Correlated_subquery
```

```
293
```

```
294 *****
```

```
295
```

```
296 Data Manipulation Language: SELECT, INSERT, UPDATE, DELETE
```

```
297
```

```
298 INSERT INTO movies(id, name, year, rankscore) VALUES (412321, 'Thor', 2011, 7);
```

```
299
```

```
300 INSERT INTO movies(id, name, year, rankscore) VALUES (412321, 'Thor', 2011, 7), (412322, 'Iron Man',  
2008, 7.9), (412323, 'Iron Man 2', 2010, 7);
```

```
301
```

```
302
```

```
303 # INSERT FROM one table to another using nested sub query: https://en.wikipedia.org/wiki/Insert_(  
SQL)#Copying_rows_from_other_tables
```

```
304
```

```
305 *****
```

```
306
```

```
307 # UPDATE Command
```

```
308 UPDATE <TableName> SET col1=val1, col2=val2 WHERE condition
```

```
309
```

```
310 UPDATE movies SET rank=9 where id=412321;
```

```
311
```

```
312 # Update multiple rows also.
```

```
313 # Can be used along with Sub-queries.
```

```
314
```

```
315 *****
```

```
316 #DELETE
```

```
317
```

```
318 DELETE FROM movies WHERE id=412321;
```

```
319
```

```
320 # Remove all rows: TRUNCATE TABLE TableName;
```

```
321 # Same as delete without a WHERE Clause.
```

```
322
```

```
323
```
