A1

Format

	A	B	C
1	Format	Extension	Description
2	Excel Workbook	.xlsx	The default Excel 2007 and later workbook format. In reality a Zip compressed archive with a directory structure of XML text documents. Functions as the primary replacement for the former binary .xls format, although it does not support Excel macros for security reasons.
3	Excel Macro-enabled Workbook	.xlsm	As Excel Workbook, but with macro support.
4	Excel Binary Workbook	.xlsb	As Excel Macro-enabled Workbook, but storing information in binary form rather than XML documents for opening and saving documents more quickly and efficiently. Intended especially for very large documents with tens of thousands of rows, and/or several hundreds of columns.
5	Excel Macro-enabled Template	.xltn	A template document that forms a basis for actual workbooks, with macro support. The replacement for the old .xlt format.
6	Excel Add-in	xlam	Excel add-in to add extra functionality and tools. Inherent macro support because of the file purpose
