

How to Print Without Newline in Python?

*Unpacks values 1, 2, 3, 4
into the print() function*

A

```
print(*range(5))
```

1, 2, 3, 4, 5

B

```
for i in range(5):  
    print(i, end=' ')
```

*Replaces default end argument
newline with empty space*

1, 2, 3, 4, 5
