

Egg Hatching Checklist

Common Supplies

Maintaining Humidity

If your humidity is too low during lockdown it is recommended to mist the water and drop them into the incubator to provide extra moisture. The water will also provide extra humidity for the incubator.

Requiring a Check

As long as the water is clean and the humidity is high, the eggs should hatch without any problems.

Requiring a Check

As long as the water is clean and the humidity is high, the eggs should hatch without any problems.

Egg Hatching Checklist
