11	11	22	33	44	55	66	77	88	99	110	121	132
12	12	24	36	48	60	72	84	96	108	120	132	144

Strategies:

2's → double

3's → count by 2's

4's → double, double

5's → count by 2's

6's → multiply by 5 then add 1 more group

7's → double, double, double

8's → multiply by 10 then subtract 1 group or find the pattern in numbers

Starting with 0 write all the numbers in order going down.

When you get to 5, add one extra, then write 10. Starting with 1 work backwards and write your numbers going all the way down. When you get to 1 start over with 5.

10's → multiply by one and add a 0

Doubles → doubles separate the chart in half, each half of the chart is the same
