

# 2023 Calendar Planner Spreadsheet

The screenshot displays a 2023 Calendar Planner Spreadsheet in Microsoft Excel. The spreadsheet is organized into three overlapping calendar views for the months of January, February, and March 2023. The January 2023 view is the most prominent, showing a grid with days of the week (Sunday through Saturday) and dates. The February 2023 view is partially visible behind the January view, and the March 2023 view is partially visible behind the February view. The Excel interface includes the ribbon (File, Home, Insert, Draw, Page Layout, Formulas, Data, Review, View, Developer, Help) and the status bar at the bottom. The status bar shows the current sheet is "Full Year 2023 - Holidays" and the zoom level is 85%.

| January 2023 |        |         |           |          |        |          |
|--------------|--------|---------|-----------|----------|--------|----------|
| Sunday       | Monday | Tuesday | Wednesday | Thursday | Friday | Saturday |
|              | 1      | 2       | 3         | 4        | 5      | 6        |
|              | 8      | 9       | 10        | 11       | 12     | 13       |
|              | 15     | 16      | 17        | 18       | 19     | 20       |
|              | 22     | 23      | 24        | 25       | 26     | 27       |
|              | 29     | 30      | 31        |          |        |          |
