```
a) public int findFreeBlock (int period, int duration) {  
    int free = -1;  
    for (int i = 0; i < 60 - duration + 1; i++) {  
        int count = 0;  
        for (int j = i; j < i + duration; j++) {  
            if (isMinuteFree (period, j)) {  
                count++;  
            }  
            if (count == duration) {  
                free = i;  
            }  
        }  
    }  
    return free;  
}
```
