PRESENTED TO
SCHLITTERBAHN
BEST INDOOR WATERPARK

RATINGS

All rides are coded and marked with an attraction rating. This rating is designed to inform guests about the ride and skills required. Look at each attraction and decide if you and/or your children can safely participate. You are the best judge of your limitations.

1 Low speed and/or shallow water attractions with passive water fun for those who want to get wet and relax. These attractions are suitable for supervised youngsters, seniors, handicapped or partially healthy limited guests.

2 Moderate thrill rides and/or water depth to 40 inches. These attractions are suitable for supervised inexperienced riders, beginner swimmers or partially handicapped guests. Some rider control and maneuvering is required.

3 High thrill and/or deep water attractions that can be stressful to those who fear high speeds, heights, or enclosed places. These rides require great rider control, swimming skills and/or physical condition. Do not use if you have any health limitations.
