The screenshot shows the SQL Server Enterprise Manager interface. The 'Table Designer' tab is active, displaying the table structure for a table named '(General)'. The table has a primary key column '(Name)' of type 'BusinessEntityID', and two other columns: 'Allow Nulls' (No) and 'Data Type' (int). The 'Default Value or Binding' column is empty. The 'Table Designer' tab is selected, and the 'General' tab is visible below it.

| (General)                |                  | ^ |
|--------------------------|------------------|---|
| (Name)                   | BusinessEntityID |   |
| Allow Nulls              | No               |   |
| Data Type                | int              |   |
| Default Value or Binding |                  |   |
| Table Designer           |                  | ▼ |

(General)

The screenshot shows the 'Table Designer' for the 'Employee' table. The table is located in the 'HumanResources' schema of the 'AdventureWorks2012' database. The table has a primary key on the 'EmployeeID' column, which is an identity column. The table is indexed and has a lock escalation set to 'Table'. The 'Regular Data Space' is 'PRIMARY', 'Replicated' is 'No', 'Row GUID Column' is 'rowguid', and 'Text/Image Filegroup' is 'PRIMARY'.

| Property      | Value                  |
|---------------|------------------------|
| (Name)        | Employee               |
| Database Name | AdventureWorks2012     |
| Description   | Employee information s |
| Schema        | HumanResources         |
| Server Name   | sqlserver2014          |

| Property             | Value   |
|----------------------|---------|
| Identity Column      |         |
| Indexable            | Yes     |
| Lock Escalation      | Table   |
| Regular Data Space   | PRIMARY |
| Replicated           | No      |
| Row GUID Column      | rowguid |
| Text/Image Filegroup | PRIMARY |
