tipsnack

The contents of the package

- The **HTML** file: This simple HTML file contains the frame outline of the downloaded Flipbook. You can browse your Flipbook by opening this file in your preferred browser.
- The **assets** folder: Here are all the assets of your Flipbook.
Note: Please do not change the contents of this folder, otherwise the downloaded Flipbook will not work.
- The **HTML** file: This is the frame that you can embed in your own website if you wish to host the Flipbook on your web server.
- The **folders**: These folders contain all the data that is needed for the Flipbook to work. Please do not change any of the files and folders found here.
