By entering in a URL in the text field below, we will create a tiny URL that **will not break in email postings** and **never expires**.

## Add TinyURL to your browser's toolbar

Click and drag the following link to your *links* toolbar.

[TinyURL!](#)

Once this is on your toolbar, you'll be able to make a TinyURL at the click of a button. By clicking on the toolbar button, a TinyURL will be created for the page you are currently at.

This is compatible with most web browsers and platforms as long as your bookmarks or favorites allow javascript. The links toolbar may not be visible in all setups and in most browsers, you can enable it in the View->Toolbars menu of your web browser. You can also put it in your bookmarks instead of the links toolbar.
