

```
intLi = []

number = int(input("Enter the Total Number of Elements: "))
for i in range(1, number + 1):
    value = int(input("Enter the %d Element : " %i))
    intLi.append(value)

item = int(input("Enter the New Element : "))
print("Original Elements are : ", intLi)
intLi.append(item)
print("New Elements are : ", intLi)
```

● ● ● IDLE Shell 3.9.2

```
Enter the Total Number of Elements: 4
Enter the 1 Element : 10
Enter the 2 Element : 20
Enter the 3 Element : 30
Enter the 4 Element : 60
Enter the New Element : 120
Original Elements are : [10, 20, 30, 60]
New Elements are : [10, 20, 30, 60, 120]
```
