

Python List

```
Fruits = ['Apple', 'Orange', 'Grape', 'Banana']  
for Fruit in Fruits:  
    print(Fruit)
```

Altering Python List using range

```
x = [1, 2, 3, 4, 5, 6, 7, 8, 9]
```

```
for Number in range(len(x)):  
    x[Number] = x[Number] * 10  
print(x)
```

```
