```python
from datetime import datetime as syd

time = syd.time(syd.now())

print('Current Time                = ', time)
print('Hour from Current Time      = ', time.hour)
print('Minute from Current Time    = ', time.minute)
print('Second from Current Time    = ', time.second)
print('Microsecond from Current Time = ', time.microsecond)
```

IDLE Shell 3.9.2

```
Current Time                = 09:41:06.645761
Hour from Current Time      = 9
Minute from Current Time    = 41
Second from Current Time    = 6
Microsecond from Current Time = 645761
```
