

The first exercise is easy. Just count in 5's and write in the answers.

The next exercise you do like this:

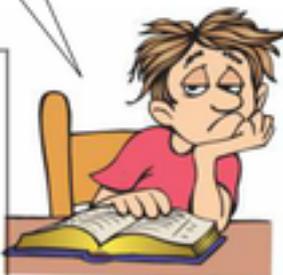

There are ____ groups of 5 in 20.

Look at the table you have just done and you will see that the answer is 4.

Follow my example and write out your 5x table

0 x 5 = ____
 1 x 5 = ____
 2 x 5 = ____
 3 x 5 = ____
 4 x 5 = ____
 5 x 5 = ____
 6 x 5 = ____
 7 x 5 = ____
 8 x 5 = ____
 9 x 5 = ____
 10 x 5 = ____
 11 x 5 = ____
 12 x 5 = ____

There are ____ groups of 5 in 5
 There are ____ groups of 5 in 25
 There are ____ groups of 5 in 40
 There are ____ groups of 5 in 10
 There are ____ groups of 5 in 35
 There are ____ groups of 5 in 45
 There are ____ groups of 5 in 15
 There are ____ groups of 5 in 30
 There are ____ groups of 5 in 55
 There are ____ groups of 5 in 20
 There are ____ groups of 5 in 50
 There are ____ groups of 5 in 40
 There are ____ groups of 5 in 0
 There are ____ groups of 5 in 60

Now try this one using the table chart above.

2 groups of 5 = ____ 6 groups of 5 = ____ 9 groups of 5 = ____
 0 groups of 5 = ____ 11 groups of 5 = ____ 8 groups of 5 = ____
 12 groups of 5 = ____ 1 group of 5 = ____ 10 groups of 5 = ____
 3 groups of 5 = ____ 7 groups of 5 = ____ 4 groups of 5 = ____

25 pies. 5 boys. How many do they each eat? ____

60 girls. 5 in a team. How many teams? ____

35 trees. 5 in each row. How many rows? ____

15 ice-creams. 5 boys. How many does eat boy eat? ____

45 pencils. Each child gets 5. How many children? ____
