

Computer Grade Surge Protective Plug Strips

Cat. No. 4950-PS

Computer Grade Surge Protective Plug Strips

Outstanding Surge Suppression protection for sensitive electronic equipment

Every commercial and industrial location uses microprocessor-driven electronic equipment that's vulnerable to random spikes and surges on AC power lines. To protect against these hazards, Leviton has developed a new line of Computer Grade Surge Protective Plug Strips that delivers highly-effective, easy-to-install, point-of-use protection for personal computers and peripherals, digital and electronic cash registers, digital audio and video installations, telephone equipment, digital scales, and other equipment.

Cat. No. 4950-PS

This Computer Grade Surge Protective Plug Strip provides outstanding surge suppression performance. It offers the convenience of six switched surge protected outlets controlled by a single recessed On/Off rocker for easy start-up, plus an additional continuously powered outlet for added convenience. An audible alarm sounds if surge protection is lost. "Protection" and "ground" indicator lights provide visual confirmation that the unit is grounded and operating normally.

Cat. No. 4950-PST

Features the same configuration and overall capabilities as Cat. No. 4950PS, plus convenient In/Out type RJ11 telephone jacks to provide surge protection for a single phone line supplying a FAX, modem, answering machine or other equipment.

Cat. No. 4950-PSC

Features the same configuration and overall capabilities as Cat. No. 4950PS, plus convenient In/Out TV "F" connectors to provide surge protection for a single CATV coax cable line.

Features

- Listed UL 1449 - Clamping level is 330 volts peak line-neutral, neutral-ground and line-ground for superior surge protection; CSA certified
- EMI/RFI noise attenuation: Up to -58 db @100KHz-100MHz
- Protection and ground indicator lights confirm that unit is operating and properly grounded
- Audible alarm if surge protection fails assures prompt attention
- Built-in 15 Amp overload circuit-breaker, with convenient reset button
- Compact design for portability and point-of-use mounting
- Seven protected outlets, six switched and one continuously live
- High impact plastic housing
- Six foot power cord with molded plug
- Rated: 15 A 125V AC
- Limited Lifetime Warranty
