Secure Contact Form is a platform independent script.

From now visitors of your site can send you a email at any time. You may use this script on any HTML or PHP page of your existing website.

It just uses 1 file for validation, creating and sending e-mail!

```
<?php
// Your current page
define('FORM_ACTION', 'index.php');
// Contact processing file
include('contact-process.php');

// Draw contact form
draw_contact_form('en');
// Set focus on error field
set_field_focus();
?>
```

Language: English
