

# ROKUGANI LUNAR CALENDAR

Rokugan uses a Lunar calendar which employs twelve months (most likely for simplicity). As a rule, each odd month has 29 days, and each even month has 30 days. The full moon is on the fifteenth of every month, and the new moon is on the last day of each month. Due to the alternating patterns of days, this allows for a slightly elliptical orbit which has a variable period for it's lunar orbit.

Rat	29 day
Ox	30 days
Tiger	29 days
Rabbit	30 days
Dragon	29 days
Snake	30 days
Horse	29 days
Sheep	30 days
Monkey	29 days
Rooster	30 days
Dog	29 days
Pig	30 days
