Executive Summary

To replace any placeholder text (such as this paragraph) with your own, click to select it and then press any key.

When you add the title on the cover page, the control containing the title remains. This is because there is another title control in the header that will automatically populate with the title you add on the cover page.

To replace the logo on the cover page or in the header, or the photo on the cover page, start by selecting it. When you do, you see a bar across the top—click the icon on that bar to select your own logo or image for replacement. Word automatically sizes and formats your image to fit the space allotted.

The table of contents that follows picks up any text that you format using Heading 1 through Heading 3 styles. To update the table after you add your own information to the document, click in the table of contents and then click the Update button on the bar that appears across the top of it.

Note: Body text such as the paragraphs above are formatted using the default Normal style. This paragraph is formatted using the style named Normal - Space After to create the space between the executive summary and the table of contents.
