Whether you are excited or scared at that prospect (or perhaps both), you decide you can't pass up the offer. You figure spending four years as a woman is certainly better than going to a different school and mountains of student loans. Maybe it will be a learning experience too. Like their brochure says:
We invite you to join us for four years that will change your life forever!

You can learn about the world at any university. But here you'll learn even more about yourself!

Congratulations on your acceptance to our university. And thank you for your willingness to participate in our Student X-Change program.

This program serves several purposes. First, it is an FDA trail of a new implantable form of X-Change being offered by the X-Change Corporation.^(*) But also it also helps promote understanding between genders and helps balance campus demographics.

Additional details will be provided at freshman orientation. We look forward to seeing you!

* Please see the enclosed disclosures regarding the risks of your participation including risks of permanency and possibility of side effects. Also enclosed are required financial disclosures regarding compensation the university receives for facilitating the trial.
