How to Delete Empty Rows in Excel

The image is a screenshot of the Microsoft Excel application window. The title bar at the top says "Book1 - Excel". The ribbon is set to the "HOME" tab, which is divided into several groups: "Clipboard" (with Paste, Copy, and Cut icons), "Font" (with options for font face like Calibri, size like 11, bold, italic, underline, color, and background color), "Alignment" (with options for text alignment, orientation, and wrapping), "Number" (with options for number format like General, currency, percentage, and decimal places), "Styles" (with Conditional Formatting, Format as Table, and Cell Styles), "Cells" (with Insert, Delete, and Format), and "Editing" (with Sum, Sort & Filter, and Find & Select). The formula bar shows "A2". The worksheet grid shows columns A through K and rows 1 through 17. Rows 2, 3, and 4 are highlighted with a thick red border, indicating they are selected. A large, thick red arrow with a black outline points from the bottom right towards the selected rows. The status bar at the bottom left says "READY", and the bottom right shows "100%".
