

# WHAT MAKES A PROGRAM MANAGER?

## Strategizing

Works with senior management executives to design strategy to accomplish stated goals and objectives for the program.

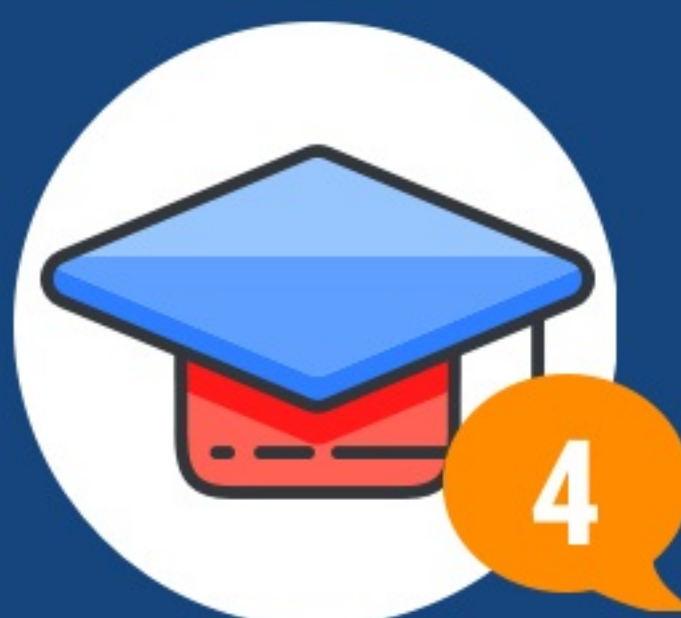

## Planning

Coordinates with project managers of each individual project in the program to define the plan and goals of those projects.

## Communicating

Create a clear line of communication between the project managers of each project and the overseeing senior management team.

## Experience

Qualified program managers have years of experience and the skillset required to manage a program
