

SUM Function in Excel

The screenshot displays the Microsoft Excel interface with the **Formulas** ribbon selected. The **Math & Trig** category is expanded, and the **SUM** function is highlighted. A red arrow points to the **SUM** option in the dropdown menu. The worksheet shows a column of values in column A, and cell C2 contains the result 535.4. A callout box shows the formula **=SUM(** followed by a reference box and the syntax **SUM(number1, [number2], ...)**.

	A	B	C	D
1	Value			
2	12.5		535.4	
3	8.2			
4	100			
5	5.6			
6	9.1
