

R2#setup

--- System Configuration Dialog ---

Continue with configuration dialog? [yes/no]: ye

At any point you may enter a question mark '?' for help.
Use ctrl-c to abort configuration dialog at any prompt.
Default settings are in square brackets '[]'.

Basic management setup configures only enough connectivity
for management of the system, extended setup will ask you
to configure each interface on the system

Would you like to enter basic management setup? [yes/no]: yes
Configuring global parameters:

Enter host name [R2]:

The enable secret is a password used to protect access to
privileged EXEC and configuration modes. This password, after
entered, becomes encrypted in the configuration.
Enter enable secret [<Use current secret>]: cisco

The enable password is used when you do not specify an
enable secret password, with some older software versions, and
some boot images.
Enter enable password: cisco1234

The virtual terminal password is used to protect
access to the router over a network interface.
Enter virtual terminal password: cisco1234
Configure System Management? [yes/no]: no
Configure SNMP Network Management? [no]:
