Equivalent Fractions using fraction strips

We can use fraction strips to determine if two fractions are equivalent by building both fractions and comparing the length of the trains. Trains that are the same length are equivalent.

these fraction trains are all the same length, so they are

Equivalent Fractions: Fraction Strips

Name _____

Each fraction. Use fraction strips to find equivalent fractions.

$\frac{1}{2}$ This fraction is _____

Equivalent Fractions: _____

$\frac{1}{4}$ This fraction is _____

Equivalent Fractions: _____

$\frac{1}{8}$ This fraction is _____

Equivalent Fractions: _____

$\frac{1}{6}$ This fraction is _____
