

Researchers surveyed recent graduates of two different universities about their income. The following two-way table displays data for the sample of graduates who responded to the survey.

Approximately what percent of graduates from University A have an income under \$30,000?
Round your answer to the nearest percent.

 %

35

Income	University A	University B	TOTAL
Under \$30,000	35	40	75
\$30,000 to \$59,999	90	63	153
\$60,000 and over	35	37	72
TOTAL	160	140	300
