

A magnifying glass with a black frame and handle is positioned over a background of binary code (0s and 1s) in a teal color. The word "ERROR" is written in large, bold, red capital letters and is centered within the lens of the magnifying glass. The background consists of multiple rows of binary digits, with some digits appearing slightly blurred to create a sense of depth. The overall image conveys a message of digital error or a search for a problem in a data-driven environment.
