

```
import pandas as pd
from matplotlib import pyplot as plt

df = pd.read_excel('/Users/suresh/Downloads/Global_Superstore.xls')
sales_data = df.groupby('Order Date')[['Sales', 'Profit']].sum()

print(sales_data.sort_values(by = ['Profit']))
plt.scatter(sales_data['Profit'], sales_data['Sales'])

plt.title('Example')
plt.xlabel('Profit')
plt.ylabel('Global Sales')
plt.show()
```
