The Kendo Angular UI Editor allows your users to edit HTML in a familiar, user-friendly way.
In this version, the Editor provides the core HTML editing engine, which includes basic text formatting, hyperlinks and lists. The widget **outputs identical HTML** across all major browsers, follows accessibility standards, and provides API for content manipulation.

Features include:

- Text formatting

• Bulleted and numbered lists

- Hyperlinks

- Cross-browser support

- Identical HTML output across browsers
