

Vertex

$$y = 1x^2 - 4x + 5$$

a) Find the axis of symmetry:

$$x = 2$$

b) To find the vertex:

$$(2, 1)$$

$$y = x^2 - 4x + 5$$

X	Y
5	10
4	5
3	2
2	1
1	2
0	5
-1	10
